DETAILED ACTION

Election/Restrictions

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
 - I. Claims 1-12 and 20 (Invention I), drawn to a method of conducting chemical reactions.
 - II. Claims 13-19 (Invention II), drawn to a device for conducting parallel chemical reactions.
2. The only technical feature, common for the inventions of the above listed groups, is a plurality of reaction vessels. The feature does not contribute any novelty over the prior art (see, for example, a plurality vessels 15 in Figure 1 of Downs et al., US 20020146818, listed in the 09/29/2008 IDS). Therefore, the unity of inventions is lacking. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The restriction is required under 35 U.S.C. 121 and 372.
3. A telephone call was made to Mr. Stephen Scanlon on 01/21/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.
